

Bake Sales and Doughnut Sales

- Do **not** prepare or serve food when ill or recently ill (within 48 hours) with vomiting or diarrhea.
- Before preparing any foods, **wash hands thoroughly** with soap and running water and dry with a paper towel. Repeat handwashing after using the bathroom, eating, smoking, using your cell phone, caring for pets, or handling raw eggs.
- Limit the bake sale menu to items which **do not require refrigeration after preparation** - no cream or custard filled pastries or pies, cheesecakes, puddings, whipped cream, cream cheese.
- Use only ingredients which are free of spoilage and come from licensed food establishments, like a grocery store or bakery. Home canned foods are not allowed.
- Keep eggs and dairy ingredients refrigerated until use.
- Clean and sanitize food preparation surfaces, utensils and equipment before beginning work.
- **Cover baked goods with plastic wrap, lids, or foil** to protect them from sneezes, coughs and handling by customers. **Keep donut boxes closed** between serving customers. Whenever possible, **wrap baked goods** in individual servings for sale to the public. **Use a napkin**, or utensil to serve items that are not individually wrapped. **Self service of unwrapped/unpackaged items is not allowed.**
- **Wash your hands** before starting the sale and after doing anything that could contaminate them, such as coughing, sneezing, eating, or using your cell phone.
- The bake sale organizer should keep a list of bakers and the items they donated in case there is a need for follow up.
- Donors are encouraged to identify/label products that contain any major allergen: peanuts/peanut butter, eggs, wheat, soybeans, milk and milk products and tree nuts (e.g. almonds, pecans, walnuts, cashews).
- All food and paper goods, even items in boxes or bags, must be stored off of the ground.
